Rejection Ratio		-	
Purity		-	
No. Of Program Set		Air Conditioner Provided	no
Compressor Details		Air Drier Details	-
Line Filter Condition		Machine Filter Condition	-
		Auto Drain Valve Working	no
Service Engineer Remarks : Machine is now operating within normal parameters			
WE ARE NOT RESPONSIBLE FOR ANY DAMAGE TO THE MARK COLOR SORTER MACHINE EJECTOR VALVES AND PNEUMATIC PARTS DUE TO OIL OR WATER PARTICLES THAT COMES FROM THE COMPRESSOR AND AIR DRIER			
Routine Maintenance			
1. Blow out the dust by using an air gun.		2. Clean the entire machine by using a soft cloth.	
3. Frequently clean the dust that settles in the vibrator tray.		4. Clean all the scattered materials that settle in the machine.	
5. Clean the sensor box glass with a separate soft cloth without scratching the glass.			
6. Frequently make sure that there is no oil or water spillage in the filter bowl of the sorter machine and compressor filter bowls, if there is any spillage immediately turn off the machine. Because it will entirely harm the machine performance and lead to the replacement of valves and all the pneumatic parts. You can run the machine only if the problem has been solved.
